SUMMARY

Analytical problem-solver with 4+ years of experience in protein and enzyme extraction, purification, and process improvement within a regulated laboratory environment. Previously held a Department of Defense Secret clearance and worked in a secure, compliance-driven setting. Completed an intensive Software Development course through LaunchCode, acquiring hands-on experience in Java, JavaScript, Spring Boot, React and full-stack web application development. Seeking a junior software developer role where a strong scientific mindset, attention to detail, and newly developed full-stack skills can be applied to building reliable, user-focused applications.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript, HTML, CSS, MySQL | React, Spring Boot | Git, Postman

EXPERIENCE

Travel Mate — LaunchCode Capstone Project

- Designed and developed a React-based web application using modular, reusable components to plan, save, and manage travel itineraries
- Implemented multi-page navigation using React Router, ensuring a seamless user experience
- Developed backend services using Java and Spring Boot to support user accounts, persistent data storage, and full CRUD operations with MySQL
- Integrated a third-party exchange REST API and handled asynchronous data fetching and state management in React
- Full Project Tech Stack: Java, JavaScript, React, Spring Boot, MySQL, HTML, CSS, exchange-api

Senior Associate Scientist — Millipore Sigma

May 2022 - August 2025

- Maintained strict documentation and quality standards while performing data-driven enzymatic and protein assays in a regulated production environment
- Updated Master Manufacturing Procedures annually and authored a new operational procedure adopted site-wide
- Managed product ordering, release, costing, and batch record research using Systems, Applications, and Products (SAP / SAP Next) and ManGo
- Resolved real-time production issues to maintain a Right-First-Time rate above 90% and delivered projects on schedule with up to 100% On-Time Delivery.
- Trained and mentored employees on ÄKTA (automated liquid chromatography system) and Unicorn software

Associate Scientist — Millipore Sigma

March 2021 - May 2022

- Designed a process improvement plan to enhance safety and operational efficiency, reducing workflow bottlenecks and improving team throughput
- Submitted recurring safety observations, demonstrating proactive attention to system improvement
- Collaborated cross-functionally with Quality Control (QC), Quality Assurance (QA), and production teams to resolve process issues, maintain production timelines, and ensure product quality standards

Lab Technician 2 — Teledyne Brown Engineering

September 2020 - March 2021

- Conducted compliance-driven testing and analysis, adhering to strict regulatory and quality standards
- Operated and maintained complex analytical systems, demonstrating strong troubleshooting and system reliability skills
- Authored clear, structured reports and data summaries using Microsoft Word and Excel, ensuring accurate documentation and knowledge sharing
- Performed equipment servicing and controlled startup/shutdown procedures
- Maintained security and data integrity standards while working under an active Secret clearance, ensuring compliance with protocols and safeguarding sensitive information

Warehouse Employee — Amazon Fulfillment

June 2019 - August 2020

- Adapted quickly to new processes through cross-training in multiple departments
- Executed high-volume, accuracy-critical tasks under strict time constraints
- Consistently achieved productivity rates of 75–350 units per hour while maintaining quality standards
- Maintained a 5S-compliant work environment, reinforcing organizational discipline and consistency

English Language Instructor — Interac Japan

March 2018 - March 2019

- Designed structured lesson plans and instructional materials for diverse student groups
- Communicated complex concepts clearly to audiences with varying proficiency levels
- Managed classrooms of 3–100 students while maintaining engagement and compliance with national standards

EDUCATION

LaunchCode, Software Development, 2026

University of Missouri

Introduction to Computing, Advanced Graduate Biochemistry, Advanced Biotechnology Laboratory II, Advanced Plant Biology and Biotechnology, Advanced Instrumental Analysis

University of Tennessee, Bachelor of Science in Biology, 2014
